**BC35R MULTIFUNCTIONAL HIGH-PERFORMANCE BICYCLE LIGHT**

**CUT-OFF FACULA LINE**

**INTELLIGENT ALARM FOR EFFECTIVE ANTI-THEFT PROTECTION**

**PRESENT OUTPUT & REMAINING BATTERY LEVEL DISPLAY**

- **Bicycle light**
  - Switches: LED forward, LED on/off
  - Battery level indication: On: 25%, Two: 50%, Three: 75%, Four: 100%
  - OLED display
  - Battery level indication and low-voltage warning
  - Quick-release light mount - easy and fast assembly
  - All-metal housing - reliable performance
  - 119mm Length x 50mm Width x 31mm Height
  - 283 grams (including mount and battery)

**Operating Instruction**

1. **Bicycle light**
   - Switches: LED forward, LED on/off
   - Battery level indication: On: 25%, Two: 50%, Three: 75%, Four: 100%

2. **Charging**
   - Use the included standard Micro USB charging cable and an adapter above 5V/1.5A, or the charging time will be prolonged.
   - While charging, the OLED screen will display a charging icon, and current battery level will be displayed. The battery full icon will be displayed and the three switches will remain green when the battery is fully charged.
   - The normal charging time of the battery battery is 3 hours from fully depleted to fully charged with the light off.
   - Once charging is completed, be sure to remove the charging cable and replace the dust cover.

**Battery level indication**

With the light switched off, single click the functional switch to check the battery status. The OLED screen will display the battery status percentage, and then goes out in 5 seconds.

Cone: 25% Two: 50% Three: 75% Four: 100%

**Anti-theft Protection**

1. When turning on/off the anti-theft alarm, make sure the security key is inserted in the remote pressure switch and the remote pressure switch is connected with the bicycle light, otherwise the alarm will not be activated.
2. Turn off the anti-theft alarm before unplugging the remote pressure switch to avoid accidental activation of the alarm.
3. Enter/Exit

**Low-voltage Warning**

When the voltage level drops below a preset level, the bicycle light is programmed to switch to a lower brightness level until low output is reached. The functional switch will flash red when the runtime of Low output level is less than 10 minutes.

**Overheat Protection**

The light will accumulate a lot of heat when working on Turbo mode. The light will automatically step down to a lower brightness level to reduce the temperature, but turbo mode can be reselected.

**Mounting Instruction**

1. Open the rubber seal of the light and plug in the remote pressure switch.
2. Loosen the screw of the brake mount. Fix the brake mount in the desired position on the bike handlebar and fasten the screw.
3. Loosen the fine adjustment screw of the handlebar mount before clamping the mount to the bar by securely tightening the set screw. Slide the light into the mount until a distinct "click" is heard.

**Technical Parameters**

- **ANSI/PLATO FL1**
  - Burst: 1,800 Lumens
  - Turbo: 1,000 Lumens
  - High: 400 Lumens
  - Medium: 120 Lumens
  - Low: 45 Lumens

- **Operating Parameters**
  - **Output**
    - 1,800 Lumens
    - 1,000 Lumens
    - 400 Lumens
    - 120 Lumens
    - 45 Lumens
  - **Runtime**
    - / 2.2h
    - 5.5h
    - 12h
    - 25h
  - **Intensity**
    - 146m
    - 119m
    - 73m
    - 45m
    - 25m

- **Impact Resistance**
  - 1m

- **Waterproof**
  - IP66

*Note: The above parameters are lab-tested by Fenix. The runtime on Turbo is the cumulative lab-tested time with overheat protection disabled. The runtime displayed on the OLED is the runtime at the current output level.*

**Warning**

1. This light is a high-intensity lighting device capable of causing severe eye damage. Avoid shining the light directly into anyone’s eyes.
2. The light will accumulate a lot of heat when working on Turbo mode. Do not touch the heat dissipation fins.
3. The light features IP66 rating protection - can be used in rainstorms and snow, but do not immerse into water.
4. Keep the light out of reach of children.
5. Disassemble the sealed head can cause damage to the light and void the warranty.
6. For secure transportation, the bicycle light is not fully charged before delivery. Recharge it before first use.

**Included in the package**

BC35R Bicycle light, Remote pressure switch, Bicycle mount, Bicycle mounting shims (thick & thin), USB charging cable, User manual, Warranty card
